Summary

Motivated and detail-oriented MCA student with a strong background in applying machine learning and computer vision to practical industry problems. Designed and deployed a T20 cricket score prediction model using XGBoost and built a low-resolution image enhancement system leveraging OpenCV and Cloud Vision APIs. Adept at Python programming, data preprocessing, model evaluation, and collaborating effectively within agile, cross-functional environments.

Education

Master of Computer Application, JECRC University	Aug 2024 – Present
Bachelor of Computer Application, JK Lakshmipat University	Aug 2021 – 2024

Projects

Cricket Score Prediction

- Built a predictive model using XGBoost Regressor (**XGBRegressor**) to forecast the final T20 match score based on match features like overs, run rate, and wickets.
- Performed data preprocessing and feature engineering using Pandas and NumPy.
- Evaluated model accuracy using MAE and RMSE, achieving low prediction error.
- Technologies Used: Python, Pandas, Matplotlib, Scikit-learn

Image Resolution

- Designed a computer vision pipeline to enhance low-resolution images for applications like surveillance, medical imaging, and document analysis.
- Implemented interpolation techniques to upscale and smooth degraded image data.
- Explored machine learning-based super-resolution methods for improving image clarity and detail recovery.
- Utilized Python, OpenCV, and NumPy for efficient image processing and visualization.
- Technologies Used: Python, OpenCV, Google Cloud Vision

Water Level Monitoring System

- Designed and developed a real-time water level monitoring system using ESP32 and ultrasonic sensors.
- Configured IoT connectivity using ThingSpeak/Blynk for live data visualization .
- Programmed the microcontroller using Arduino IDE with data transmission via Wi-Fi.
- Technologies Used: ESP32, HC-SR-04, Arduino IDE, ThingSpeak/Blynk, Wi-Fi, MQTT

Technical Skills

Languages: C++, Python, JavaScript(Basic)

Frontend: React.js

Database: MongoDB Atlas(Basic)

Soft Skills

Time Management, Quick Learner, Responsible, Adaptability

Achievements

Hackathon: Qualified for National India Hackthon in 2024

Cloud Certificate: Certification of qwik labs in cloud
